Bio:

Alla Borovskaia and Milana Borovskaia are Maryland-based artist duo. Alla Borovskaia has been working in the field of art and design for over 30 years. Their artistic practice consists of creating large scale wall sculptural installations, wall and freestanding sculptures, and mixed media. They create their works using unique signature techniques, processes and combinations, which makes their works special and reveals the scale of the movement of color, shape and energy! Over the years, Alla and Milana have exhibited their art in Italy, Eastern Europe and in galleries in the United States.

Artist statement:

Our vision comes from that which surrounds us, from that which is created for the human being and well perceived by the people.

As artists, we expect our art to evoke emotions that most positively convey the energy of creation around us.

This is why we use natural materials, which come from the energy of life in themselves and which include a reflection of everything we want to transmit!

CV

This summary demonstrates what was done during the artistic duo Alla Borovskaia and Milana Borovskaia.
